## Programs Offered

The Laney Graduate School offers more than 40 doctoral and master's programs across the humanities, the social, biomedical, and natural sciences, public health, nursing, and business. We are committed to the creation of new knowledge and to graduate education that provides students with deep expertise in their chosen fields, creativity to cross disciplinary boundaries and courage to take on the most important and complex problems of our time.

All doctoral students participate in the Teaching Assistant Training and Teaching Opportunity (TATTO) program, which provides a gradual introduction to college-level teaching. TATTO embodies the University's commitment to excellence in teaching. Doctoral students also have access to a range of professionalization resources, including: Professional Development Support Funds that provide funding for conference attendance, specialized training, and research; a Grant Writing Program that addresses every stage of grant proposal writing from developing fundable projects to tailoring proposals for specific funders; Networking and Mentoring programs that connect graduate students to alumni for professional guidance; the Program for Scholarly Integrity that offers training in ethics and the responsible conduct of research; and more.

The Laney Graduate School's English Language Support Program provides language assessment and instruction to students whose first language is not English.

The Laney Graduate School supports a number of interdisciplinary PhD programs, several of which rank among the top-rated interdisciplinary programs in the nation. Among these are the Graduate Institute of the Liberal Arts, the Graduate Division of Religion, the Graduate Division of Biological and Biomedical Sciences, Biomedical Engineering and the program in Women's, Gender, and Sexuality Studies.

The Laney Graduate School, in collaboration with schools and units across Emory's campus and with area institutes, offers to its graduate students a number of unique opportunities that promote cross-disciplinary training, interdisciplinary research and public scholarship.

### Programs Offered cont'd

These programs bring graduate students from all disciplines in contact with each other and with faculty from the humanities, social sciences, and biomedical and natural sciences to work with health care professionals, community leaders and researchers and scholars from across the country. Included among these programs are the Center for Mind, Brain and Culture, the University and Community Partnerships fellowship program, the Center for the Study of Law and Religion, the Race and Difference Initiative and the Fox Center for Humanistic Inquiry.

The areas of study with the largest enrollment are the Graduate Division of Biological and Biomedical Sciences, the Graduate Division of Religion, and Chemistry.

## YERKES NATIONAL PRIMATE RESEARCH CENTER

**Established** 1930

### **Historical Dates**

1930 – Yale psychobiologist Robert M. Yerkes, PhD, founded the Yale Anthropoid Experiment Station, later known as the Yale Laboratories of Primate Biology. Following Yerkes' retirement, the center was renamed in his honor.

1956 – Yale University transferred ownership of the Yerkes Laboratory of Primate Biology to Emory University.

1960 – Congress passed legislation creating the National Institutes of Health's Regional Primate Research Centers program to provide the scientific community with specialized resources needed for primate research. The next year, Emory and six other research universities were selected as sites for the regional primate research centers.

1965 – Federal funding enabled Emory to construct primate housing, lab and support facilities on its main campus and at a satellite location in Lawrenceville, Georgia. This same year, the Yerkes Research Center moved to Atlanta and has served ever since as a focal point for crossdisciplinary collaboration in research both within Emory and with affiliated scientists at other institutions across the country and the world.

1985 – The Yerkes Research Center received full accreditation from The Council on Accreditation of the Assessment and Accreditation of Laboratory Animal Care International (AAALAC), the gold standard of laboratory animal care. Yerkes has maintained full AAALAC accreditation for 26 consecutive years.

1999 – The Yerkes facility was expanded to accommodate the newly established Emory Vaccine Center, to facilitate vaccine development and research in AIDS, malaria, hepatitis C and other infectious diseases. This same year, the Yerkes Research Center became the first home for the newly formed Center for Behavioral Neuroscience (CBN), which provided resources to foster innovative research on the basic neurobiology of complex social behaviors associated with fear, aggression, affiliation and reproduction.

YERKES

2001 – The DNA vaccine microbiologist Harriet Robinson, PhD, developed was shown to prevent development of AIDS in monkeys infected with a highly virulent form of HIV. Today, this vaccine is in clinical trials in humans. This same year, memory expert Stuart Zola, PhD, came to Emory from UC San Diego to become director of the Yerkes Research Center.

2002 – The NIH designated the Yerkes Research Center and seven other primate research centers as national primate research centers in recognition of their involvement with and impact on research programs worldwide.

2003 – The Yerkes Research Center became a critical component of the Southeastern Regional Center of Excellence for Emerging Infections and Biodefense, a federally funded initiative to develop new vaccines, drugs and diagnostic tests against emerging infections and to defend against organisms that might be used in bioterrorist attacks.

2004 – The Yerkes Research Center opened a new 92,000-square-foot neuroscience research building with state-of-the-art lab and imaging facilities currently used by scientists throughout the university. The Yerkes Research Center is the only center to have onsite MRI, PET and cyclotron facilities. The center has invested more than \$3 million in imaging capabilities to facilitate neuroscience research projects involving studies of anatomy, physiology and function.

2005 – The Yerkes Research Center celebrated its 75<sup>th</sup> anniversary of advancing science and improving health.

2007 – The National Institute of Aging granted Yerkes researchers more than \$10 million during a five-year period to compare changes that occur in normal aging humans, humans with Alzheimer's disease and humans with mild cognitive impairment to changes that occur in nonhuman primates. The goal is to identify ways to diagnose aging-related diseases earlier in order to increase the chances for effective treatment as well as to develop new treatments based on specific physiological changes. This is the largest grant Yerkes has ever received.

2008 – In the first study of its kind, Yerkes researchers developed the first transgenic nonhuman primate model of Huntington's disease (HD). This development is expected to lead to greater understanding of the underlying biology of HD and to the development of potential therapies. This same year, Yerkes opened a multi-purpose building at its

field station in Lawrenceville. Certified LEED Gold, the CVMAR as it's known is the cornerstone for programs using social colonies of genetically typed nonhuman primates to help researchers understand the interaction between genetics and environment and the roles they play in human health and disease.

2009 – Three Yerkes researchers received highest honors for their work to advance science and improve health. Yerkes director Dr. Stuart Zola and researcher Larry Young, PhD, were selected as fellows of the American Association for the Advancement of Science, an honor the organization's members bestow upon their peers. Dr. Young also received one of only four McKnight Technological Innovations in Neuroscience awards this year. Kerry Ressler, MD, PhD, was also recognized for his contributions with the prestigious Freedman Award, which the National Alliance for Research on Schizophrenia and Depression presents annually.

2010 – The National Institutes of Health awarded Emory University \$6.6 million to support a Morris K. Udall Center of Excellence in Parkinson's Disease Research to facilitate collaboration among researchers who will focus on developing more effective Parkinson's disease treatments with fewer side effects. Yerkes Researcher Thomas Wichmann, MD, is the principal investigator of the new center.

2011 – The Yerkes Research Center began construction on its Dual-Function Facility, which will further research in the national health priority areas of infectious diseases and transplantation. The National Institutes of Health awarded the Yerkes Research Center \$15 million for this construction as part of the American Reinvestment and Recovery Act.

### **Research Programs**

For more than eight decades, the Yerkes National Primate Research Center, Emory University, has been dedicated to conducting essential basic science and translational research to advance scientific understanding and to improve the health and well-being of humans and nonhuman primates. Today, the center, as one of only eight National Institutes of Health-funded national primate research centers, provides leadership, training and resources to foster scientific creativity, collaboration and discoveries. Yerkes-based research is grounded in scientific integrity, expert knowledge, respect for colleagues, an open exchange of ideas and compassionate quality animal care.

**Research Programs cont'd**

Within the fields of microbiology and immunology, neurologic diseases, neuropharmacology, behavioral, cognitive and developmental neuroscience, and psychiatric disorders, Yerkes-based research programs are seeking ways to: develop vaccines for infectious and noninfectious diseases; treat and even prevent autism spectrum disorders, fear and anxiety-related disorders, and drug addiction; interpret brain activity through imaging; unlock the secrets of memory; increase understanding of progressive illnesses, such as Alzheimer's and Parkinson's diseases, and develop methods for the earliest possible diagnosis; determine how the interaction between genetics and society shape who we are; and advance knowledge about the evolutionary links between biology and behavior.

## UNIVERSITY LIBRARIES

### Historical Dates

1897 – Construction of (Warren Akin) Candler Library, first separate library on original campus at Oxford, Georgia.

1911 – Purchase of first significant collection of rare books and manuscripts, a collection of books and papers associated with John Wesley and his family.

1926 – Opening of (Asa Griggs) Candler Library, first separate library on new Atlanta campus.

1969 – Opening of the Robert W. Woodruff Library, the first library building at Emory since 1926, providing capacity for more than a million volumes.

1972 – One-millionth volume is added to the University's libraries.

1975 – Purchase of the 220,000-volume collection of the Hartford Seminary moves Pitts Theology Library into the front ranks of America's theology libraries

1976 – Pitts Theology Library expands into renovated space, occupying the entire original Theology Building.

1979 – Acquisition of the W.B. Yeats collection, Woodruff Library's first step in building world-class poetry and modern literary archives.

1987 – Two-millionth volume is added to the University's library holdings.

1987 – Creation of the Health Sciences Library, bringing together medical and dental libraries in a new location.

1994 – Launch of Virtual Library Project, marking the beginning of Emory libraries' digital projects and programs.

1995 – Opening of the Hugh F. MacMillan Law Library.

1997 – Appointment of Woodruff Library’s first African-American bibliographer, recognizing the Library’s distinctive and growing archival and special collections in African-American culture.

1998 – Dedication of the Center for Library and Information Resources, a major addition to the Woodruff Library.

2001 – Dedication of the Marian K. Heilbrun Music and Media Library on Level 4 of the Center for Library and Information Resources.

2003 – Reopening and dedication of the renovated Asa G. Candler Library, featuring the newly restored William L. Matheson Reading Room.

2004 – Acquisition of the Raymond Danowski Poetry Library, the largest collection of modern English-language poetry ever assembled by a private collector (some 70,000 volumes).

2006 – Acquisition of literary archive of Salman Rushdie.

2007 – Acquisition of archives of Pulitzer Prize-winner Alice Walker.

2008 – Southern Christian Leadership Conference (SCLC) places archive at Emory.

2010 – Opening of the Salman Rushdie Archives and Exhibition.

### **Information About Libraries**

The Libraries of Emory University include the Robert W. Woodruff Library, as well as libraries for health sciences, law, theology, business and Oxford College. Holdings of the Emory Libraries total approximately 3.6 million print and electronic volumes, more than 50,000-plus electronic journals, and internationally renowned special collections including more than 25,000 linear feet of manuscripts and archives.

Emory’s Manuscript, Archives and Rare Book Library (MARBL) offers rich collections in areas such as the Irish literary revival, 20th Century American, British and Irish poetry, and African-American literature, history and culture. African Americans in sports represents a new collecting focus announced in 2011. MARBL also is strong in research collections devoted to the social and cultural history of the American South, with a particular emphasis on Georgia and Atlanta.

The libraries offer access to thousands of electronic information resources, including in-house digital innovations such as The Trans-Atlantic Slave Trade Database (<http://www.slavevoyages.org>), the Internet journal Southern Spaces ([www.southernspaces.org](http://www.southernspaces.org)), and the Global Health Chronicles (<http://globalhealthchronicles.org>).

Pitts Theology Library, the third-largest theology library in the country, is home to the Richard C. Kessler Reformation Collection. The Woodruff Health Sciences Center Library includes branches at Grady Hospital and Emory Hospital. Emory University’s Hugh F. MacMillan Law Library is a selective depository for U.S. government documents, and is a full depository for publications of the European Union.

The Emory Libraries are members of the Association of Research Libraries, OCLC, the Center for Research Libraries, the Coalition for Networked Information, and the Digital Library Federation. For more information about the libraries and strategic plan, visit <http://web.library.emory.edu>.

## UNIVERSITY TECHNOLOGY SERVICES

### Historical Dates:

1965 – “Emory Biomedical Data Processing and Analysis Center” (EBDPAC) established with a mission to support biomedical research.

1968 – Center renamed the “Emory University Computing Center” (EUCC) with a university-wide mission.

1971 – Installation of a remote access timesharing computer (RCA Spectra/70).

1973 – An academically focused “Scientific and Instructional Computing Group” established within EUCC.

1982 – The growth of early desktop computer use on campus leads to formation of a Microcomputing Support Group within EUCC.

1986 – Establishment of first IT Help Desk.

1987 – EUCC builds custom “Emory XT” and “Emory AT” desktop computers.

1988 – Position of “Vice Provost for IT” created.

1989 – Renamed ITD (Information Technology Division) with merger of “EUCC”, “Telecommunications” and “Multimedia Communications”.

1990 – Opening of the “Faculty Information Technology Center”, a joint project of ITD and the University Libraries.

1994 – The Biology Department’s “Project LearnLink” merges into ITD.

1995 – First Emory University website goes live.

2002 – The Computing Center at Cox Hall opens.

2005 – Position of “Chief Information Officer” (CIO) created.

2008 – UTS completes major reorganization to meet future needs of Emory.

**About UTS:**

University Technology Services (UTS) enables Emory to teach, learn, and innovate by providing stable information technology services. UTS provides enterprise services to Emory University and Emory Healthcare including administrative applications (PeopleSoft), email and calendaring (Exchange), and 24 hour support services (call center and data center). UTS also provides telephone, wireless and wired data networking, paging, cable television, and radio and video services to the Emory enterprise.

Additionally, UTS provides many academically focused technology resources and applications (Blackboard) and support for over 100 technology enriched classrooms. UTS's computing centers and labs include Emory's award-winning Center for Interactive Teaching (ECIT). Collaborative work is enabled for students and faculty in the Computing Center at Cox Hall.

UTS is organized into the following groups:

- Academic Services
- Call Center
- Enterprise Services
- Infrastructure
- Enterprise Applications
- Integration
- Project Management
